

Feature Settings

Expand "Tools" section in left navigation bar and click on "Manage Settings" link. Manage settings page will display, click on "Features" tab to control the display and functioning of front end pages. Features settings is categorized as:

1. KB Layout Settings
2. Home Page Settings
3. Pages

The screenshot shows the 'KB LAYOUT SETTINGS' interface. Under 'Front End Layout', there are two radio buttons: 'Fixed (900px)' and 'Fluid (100%)', with 'Fluid (100%)' selected. Under 'Home Page Theme', there are three radio buttons: 'Theme 1', 'Theme 2', and 'Theme 3', with 'Theme 3' selected. Below the radio buttons are three layout diagrams for Theme 1, Theme 2, and Theme 3. Theme 1 shows a vertical stack: HEADER, NEWS, CATEGORIES, and two ARTICLES columns. Theme 2 shows a vertical stack: HEADER, NEWS, ARTICLES, ARTICLES, ARTICLES, with a vertical CATEGORY TREE on the left. Theme 3 shows a vertical stack: HEADER, NEWS, ARTICLES, with a vertical CATEGORY TREE on the left. A red 'SAVE' button is located in the top right corner.

Front End Layout: If the **Fixed (900px)** option is checked, the front end will be displayed in the center and take 900px of screen width irrespective of screen resolution. On the other hand, if **Fluid (100%)** is checked then the front-end would cover the whole width of the screen.

Home Page Theme: The [knowledge base software](#) provides three themes based on how the knowledge base home page will display category tree, news, and article lists. Choose the one as per your preference.

The screenshot shows the 'Article Page Theme' settings. There are two radio buttons: 'Theme 1' and 'Theme 2', with 'Theme 2' selected. Below the radio buttons are two layout diagrams for Theme 1 and Theme 2. Theme 1 shows a vertical stack: HEADER, Article Title, article content comes here, and a vertical bar labeled OPTIONS. Theme 2 shows a vertical stack: HEADER, Article Title, article content comes here, and a vertical bar labeled OPTIONS, with a vertical CATEGORY TREE on the left. Below the diagrams are two dropdown menus: 'Category Tree Width' set to 25% and 'Category Columns' set to 3 (with the note '(Display in Number of Columns)'). A red 'SAVE' button is located in the bottom right corner.

Article Page Theme: Two themes are available for the orientation of the article page. Themes are designed to arrange the article parts like article title, article contents, category Tree, headings, article options at different locations.

Category Tree Width: This setting allows you to specify the percentage width that the category tree will take in proportion to the whole width. You can select any value between 20% to 30% from the drop-down list.

Category Columns: Select the number of columns into which you want to arrange the knowledge base categories.

Show Articles in Category Tree? Yes, show them

Category Articles Count? Show Hide

Sort Categories By Alphabetic Order Priority

Show Articles in Category Tree?: The title of articles of the category will appear in the category tree if this setting is enabled.

Category Articles Count: If the Show option is chosen, it will display a count of the total published articles available under the category. It is recommended to disable this setting for a knowledge base having a huge number of articles.

Sort Categories By?: If **Alphabetic Order** is checked, categories will be displayed according to their names arranged in alphabetic order. You can mark the **Priority** option to display categories according to the priority level assigned to them in manage categories.

HOME PAGE SETTINGS

Display Featured Articles? Yes

Display Most Popular Articles? Yes

Display Recently Added Articles? Yes

Display Top Rated Articles? Yes

Display Featured Articles?: Enable this option if you want to display "**Featured Articles**" on the home page of the front end.

Number of Articles - Enter the count of featured articles that you want to display.

Display Most Popular Articles?: Enable this option if you want to display "**Most Popular Articles**" on the home page of the front-end knowledge base. **Number of Articles** - Enter the number of most popular articles that you want to display.

Display Top Rated Articles?: Enable this option if you want to display the "**Top-Rated Articles**" section on the home page of the knowledge base. **Number of Articles** - Enter the number of top-rated articles you want to display in this section.

PAGES

SUBSCRIBE PAGE

Enable Subscribe to KB? Yes

CATEGORY PAGE

Sort Articles By Popularity Alphabetic Order Update Date Time

Sort Order Descending Ascending

Subscribe to Category? Yes

Enable Subscribe to KB?: If the option is marked as **Yes**, subscribe to the Knowledge base section will be visible to KB users (end users) to subscribe to the knowledge base and to get notified when articles are added or edited.

Sort Articles By It displays three options by which articles can be sorted in the knowledge base. If **Popularity** is checked, the articles are sorted according to the article hits. If **Alphabetic Order** is checked, the articles are sorted according to the alphabetic order of their titles. If **Update Date Time** is checked, the articles are sorted according to the date they were last updated.

Sort Order: This option allows to specify the chronological order of the 'Sort Articles By' setting. You can either choose ascending or descending order according to your choice.

Subscribe To Category?: If the option is marked as **Yes**, the '**Subscribe**' link will be displayed with the category title on the category page and users can subscribe to a category to get notified when new articles are posted under the category.

The screenshot shows the 'NEWS PAGE' settings section. It includes three checkboxes: 'Enable News Page?' (checked), 'Display News on Home Page?' (checked), and 'Enable Login Page?' (unchecked). A text input field for 'Number of News' contains the value '5'. A red 'SAVE' button is located to the right of the 'Number of News' field. Below this section is the 'LOGIN PAGE' section, which is currently empty.

Enable News Page?: If checked, it will display a **News** link in the knowledge base header and corresponding news page in the knowledge base.

Display News On Home Page?: If checked, displays the recent news headlines on the home page of the knowledge base.

Number of News - Enter the number of news headlines you want to display in the "News & Announcements" section on the home page of your knowledge base.

Enable Login Page?: If a setting is marked as **Yes**, it will display **Login** link in the knowledge base header, and KB Member users will be able to login to the knowledge base and access private data.

The screenshot shows two sections: 'GLOSSARY PAGE' and 'CONTACT PAGE'. The 'GLOSSARY PAGE' section has one checkbox: 'Enable Glossary Page?' (checked). The 'CONTACT PAGE' section has four checkboxes: 'Enable Contact Page?' (checked), 'Enable My Tickets Page?' (checked), 'Send Notification?' (checked), and 'Instant Suggestions?' (checked). There is a text input field for 'Contact Email Address(es)' containing 'hema-rafeeza@gmail.com' and another for 'Minimum Question Characters' containing '60'. A red 'SAVE' button is located to the right of the 'CONTACT PAGE' section.

Enable Glossary Page: If the option is marked as **Yes**, the **Glossary** link will be displayed in the knowledge base header and allows KB users to access the glossary page.

Enable My Tickets Page?: If the option is marked as **Yes**, the **My Tickets** link will be displayed in the knowledge base header and allows KB users to access the "My tickets" page. This option is available only in the enterprise edition of PHPKB Software.

Enable Contact Page? : If the option is marked as **Yes**, the **Ask a Question** link will be displayed in the header of the

knowledge base and allows KB users to post their questions.

Send Notification? : If the option is marked as **Yes**, the software sends a ticket creation notification email to the email address specified by the user on the "Ask a Question" page.

Contact Email Address(es): Specify the email address of your organization on which contact page notifications will be sent and which will be used as the default **"From"** address in outgoing emails.

Instant Suggestions? : If it is enabled, articles relevant to user queries would be displayed to users while they type the query on the "Ask A Question" page.

Minimum Question Characters: It allows you to set the minimum number of characters users should type in a content field of the "Ask A Question" page. The user would be compelled to write at least the characters specified in this setting.

The screenshot displays the configuration interface for the search page. It is divided into two main sections: 'SEARCH PAGE' and 'OTHER OPTIONS'. In the 'SEARCH PAGE' section, there are two dropdown menus: 'Default Search' is currently set to 'Articles', and 'Search In' is set to 'All'. To the right of these dropdowns is a red button with a floppy disk icon and the text 'SAVE'. The 'OTHER OPTIONS' section contains a checkbox labeled 'Recently Viewed Articles?' which is checked with a green checkmark and the word 'Yes' next to it. To the right of this checkbox is a text input field labeled 'Number of Articles' with the value '5' entered.

Default Search: Select one option among articles, news or categories so that it can be set as the default option in the "Search for" field of the advanced search page.

Search In: Select one option among all, titles, content, or keywords so that it can be set as the default option in the "Search In" field of the advanced search page.

Recently Viewed Articles? : Enable it to display a list of **Recently Viewed Articles** below the category tree in the knowledge base. Enter the count of the number of recently viewed articles to be displayed in the **Number of Articles** setting.

Click on the **"Save Changes"** button to save the modifications you have made or you can click on the **"Cancel"** button to abandon the changes.
