Configuring PHP OpenSSL Extension with IIS via PHP Manager on Windows
📄 181   👤 Palwinder Singh   📅 February 3, 2020   📁 *Software Maintenance, Troubleshooting*   👁 20069   💬 0

This section provides a tutorial example on how to install and configure PHP OpenSSL extension/module with IIS on Windows via PHP Manager.

STEPS - How to do:

1. Open **Internet Information Services (IIS) Manager** , expand < *Your-Server-Name* > option then expand **Sites** then choose the desired [PHPKB] site or **Default Web Site** if you have only site (see image below).

2. On the right side, you would find **PHP Manager** (if it is unavailable then you can install it using **Web Platform Installer** highlighted in RED colored box with **2**), click to open that (see image below).

3. Under **PHP Extensions** section, click Enable or disable an extension (see image below).

PHP Manager

Use this feature to check the PHP runtime settings, to configure PHP runtime directives and to enable or di

PHP Setup

PHP version:	5.6.22
PHP executable:	C:\Program Files (x86)\PHP\v5.6\php-cgi.exe
Handler mapping:	Local

Register new PHP version | Change PHP version | Check phpinfo()

PHP Settings

Configuration file:	C:\Program Files (x86)\PHP\v5.6\php.ini
Error log:	C:\Windows\temp\PHP56_errors.log

Configure error reporting | Set runtime limits | Manage all settings

PHP Extensions

1

There are 17 extensions enabled.

There are 37 extensions installed.

2

Enable or disable an extension | Add an extension

4. Then you would see the enabled extensions under **Enabled** section and disabled extensions just below the **Disabled** (it would be greyed out) section (see image below).

Enabled	
php_curl.dll	Enabled
php_exif.dll	Enabled
php_gd2.dll	Enabled
php_gettext.dll	Enabled
php_imap.dll	Enabled
php_ldap.dll	Enabled
php_mbstring.dll	Enabled
php_mysql.dll	Enabled
php_mysqli.dll	Enabled
php_pdo_mysql.dll	Enabled
php_pdo_sqlite.dll	Enabled
php_pdo_sqlsrv.dll	Enabled
php_soap.dll	Enabled
php_sqlsrv.dll	Enabled
php_tidy.dll	Enabled
php_xmlrpc.dll	Enabled
Disabled	
php_bz2.dll	Disabled
php_com_dotnet.dll	Disabled

5. Scroll down and find **php_openssl.dll** extension, right click on it and then click **Enable** option (see image below).

php_oci8_12c.dll	Disabled
php_opcache.dll	Disabled
php_openssl.dll	Disabled
php_pdo_firebird.dll	Disabled
php_pdo_oci.dll	Disabled

6. Now, it would be moved to **Enabled** extensions list and then right click on your **Web Site** name (listed on the left side tree) then hover **Manage Website** and click **Restart** option (see image below).

That's all!
