

How to Upgrade from PHPKB 7 to 7.5?

This information is applicable only to the customers that are already using any edition of PHPKB 7.0 and would like to upgrade from PHPKB 7.0 to PHPKB 7.5. If you are a PHPKB 7.0 customer with an active support and maintenance subscription, then you can download a free upgrade to PHPKB 7.5 from your [customer area](#). You may wish to take a look at [PHPKB 7.5 Release Notes](#) to see what is new in the latest version. Please follow the instructions below on how to download the free upgrade.

Downloading PHPKB 7.5 Upgrade

All eligible PHPKB 7.0 customers are entitled to receive a free upgrade to PHPKB 7.5. To know if you are eligible for downloading a free upgrade, have a look at the conditions given below. You are eligible:

If you have purchased any edition of PHPKB 6.0.x or PHPKB 7.0 software license in the last 12 months.

If you have purchased an active support and software maintenance subscription.

If you satisfy any of the above-mentioned conditions, you are eligible to get a free upgrade to version 7.5 from the customer area of our website. Please login to the customer area with your account details and click on the "**PHPKB 7.5 Upgrade**" link in the left menu as shown in the image below.

The screenshot shows a user's dashboard. On the left, a vertical menu contains several options: 'Welcome Page', 'Order History', 'Contact Details', 'Support Tickets', 'Submit Support Ticket', 'Upgrade Options', 'Buy More Licenses', and 'PHPKB 7.5 Upgrade'. The 'PHPKB 7.5 Upgrade' option is highlighted with a red rectangular border. The main content area displays a welcome message for 'Keith', his last login time, and sections for 'Account Statistics' (Total Orders, Last Purchased, Order Number, Order Status, Ordered from IP Address) and 'Contact Details' (Name, Email Address, Customer Since, Address).

If you do not see the link to download the free upgrade or if you see the message shown below, it means that you are not eligible to get a free upgrade to PHPKB 7.5 however you can still buy the upgrade to PHPKB 7.5.

You are not eligible to download a free upgrade to PHPKB 7.5 because you do not have an active support and software maintenance subscription. However, you can purchase the upgrade to PHPKB 7.5 from the "Upgrade Options" link on the left side. You will get 20% discount on the normal price being an existing customer. It will open the "Online Upgrade Form" where can select the "Upgrade Type" as "Upgrade PHPKB Edition" and select the upgrade edition you would like to buy.

Note : Once you have downloaded the free upgrade package, your download status will be marked as completed and the download link will be removed from your customer area.

Important Message

The free upgrade package of PHPKB 7.5 comes with its default layout and features. It is strongly advised not to perform the upgrade if your existing PHPKB 6.0.x or 7.0 package has been customized, modified, or changed in any way. If you do it, you will lose all customizations done in your existing knowledge base. We shall not be responsible for loss of any kind. Please proceed only if your PHPKB package has not been modified in any way and the database tables have not been altered from their default structure. If we have customized your PHPKB package, you may [contact us](#) to get the same customizations done in version 7.5 for you as a paid job.

Please refer to the upgrade instructions below on how to perform the upgrade from version 7.0 to 7.5 of PHPKB knowledge base software.

Upgrade Instructions

Information Note

For the purpose of explaining upgrade steps, we assume that you have PHPKB 7.0 installed at `http://yoursite.com/phpkbv7/` where "yourdomain.com" is your site/host name "phpkbv7" is the name of existing knowledge base folder. So, please replace these values accordingly while following the steps below.

1. **Take Backup:** Although no changes are made in the database structure from PHPKB 7.0 to 7.5 yet it is strongly recommended to take a full backup of your existing knowledge base folder and its database. Please read the "[how to take backup of your knowledge base data](#)" article for detailed instructions.
2. **Unzip Upgrade Package:** Unzip the contents of the upgrade package downloaded from the customer area. You will see a folder called "phpkbv7". **Please rename it to "phpkbv75" to distinguish it from your existing "phpkbv7" folder.**
3. **Uploading Upgrade Package:** Upload this folder "phpkbv75" to the same server as your existing knowledge base i.e. "phpkbv7". This means if your existing knowledge base can be accessed at `http://www.yourdomain.com/phpkbv7/` then the new version package should be accessible at `http://www.yourdomain.com/phpkbv75/`
4. **Copy Important Files:** Please copy the following items from your existing PHPKB (version 7) folder to the newly downloaded "phpkbv75" folder.
 1. configuration.php from "phpkbv7/admin/include/" folder to "phpkbv75/admin/include/" folder.
 2. system.php from "phpkbv7/admin/include/" folder to "phpkbv75/admin/include/" folder.
 3. All files present under "phpkbv7/assets/" folder to "phpkbv75/assets/" folder.
 4. If you are using the multi-language edition of PHPKB 7.0 then copy all languages files except en.php from the "phpkbv7/admin/languages/" folder to the "phpkbv75/admin/languages/" folder.
5. **Change KB URL:** After putting the files at their respective locations, now, it is time to change KB URL which looks like this (in "phpkbv75/admin/include/configuration.php"): `$path_kb = "http://Your-Domain/phpkbv7";` and change it to `$path_kb = "http://Your-Domain/phpkbv75";`. At last, save your changes and exit.

You can now log in to the admin area of PHPKB 7.5 to see if everything works as expected. Once you are satisfied with the working of PHPKB 7.5, you can discard your previous "phpkbv7" folder. If you have any queries or doubts, please feel free to submit them as a new support ticket from the customer area.
