

How to set up folder permissions in Internet Information Services (IIS)?

This article explains how to set up write permissions in the required folders for configuring IIS 7.0, 7.5, or 8.0 on Microsoft Windows Server for installation of [PHPKB Knowledge Base Software](#).

In order to install [PHPKB knowledge management software](#) on IIS, you need to set write permissions for following folders:

inetpub/wwwroot/phpkb/assets - for all file uploads

inetpub/wwwroot/phpkb/assets/tmp - for temporary storage of files uploaded from create/edit article page

inetpub/wwwroot/phpkb/sitemap - for sitemap generation

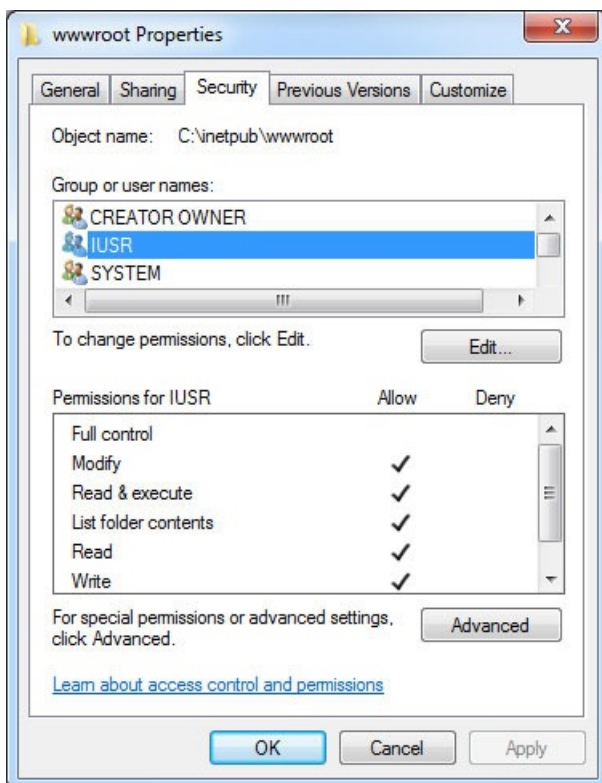

inetpub/wwwroot/phpkb/admin/include - to store KB configuration and settings file

inetpub/wwwroot/phpkb/admin/backups - to store backups of your knowledge base data

inetpub/wwwroot/phpkb/admin/languages - to store language files in multi-language edition

For each of the above folders, do the following:

1. Right-click the directory, then choose **Properties**
2. Go to the **Security** tab
3. Find the **IUSR** account (If IUSR is not in the list, add it by clicking **Edit**, then click **Add**, and then typing "IUSR" in the "Enter the object names to select" field.)
4. Highlight the user in the list, click **Edit**, and grant the account **Modify** and **Write** permissions
